

SmartFridge™ and GuestFridge

MINIBAR SYSTEMS
smart bars • smart people • smart solutions

SmartFridge

The intelligent fridge that cools only when your guests need it!

SmartFridge, an innovative new product from Minibar Systems, redefines hotel in-room convenience refrigeration technology with benefits for both guests and hotels. The control panel lets guests use the fridge when needed and can be shutdown when not needed, saving up to 50% of specified energy consumption.

Hotels are now able to offer guests the amenity they ask for and benefit from our fundamental commitment to develop sustainable products.

- LED guest convenience control panel
- Saves up to 50% in energy consumption
- Self-executing diagnostic tests
- Quiet compressor technology

**Also available as "GuestFridge" model without control panel*

SmartFridge Models

Door Options

(Available for both SmartFridge and GuestFridge Models)

Solid Black Door

Stainless Steel Glass Door

Black Metal Glass Door

SmartFridge 50 Control Panel On Top

Ventilation requirements for built-in fridges:

A channel for air circulation is imperative for ventilation and operation. A minimum open area of 31 in² (200 cm²) is required for proper ventilation. Please refer to the Minibar Case Good Specifications manual for all details. Inadequate ventilation will void warranty.

Average energy consumption per 24 hours at 77° F (25° C). Energy consumption reduced up to 50% with **ON/OFF shutdown feature on SmartFridge control panel.

***Our production plant is ISO 9001 certified.

‡Specifications may change without notice due to continuous product development.
